Foodle

With our project, we want to help our users with their restaurant choices. Nowadays, the prices of food and drinks at restaurants are constantly changing. Also, ad photos of the restaurant menus can be misleading. The photos are mostly faked. Our project will provide our users with up-to-date and correct menu details of the restaurants and the actual photos of the meals that are ordered by others. Users can rate the experiences that they had or they can also write reviews about them. Additionally, users can filter nearby restaurants by their preferences.
